**Application Deadline:** December 20, 2016

#### Description

Participants will read some of the best literature regarding how learning happens, how to design maximally effective courses, and how to improve classroom practice with a special emphasis on inclusive pedagogy. The goal is not only to provide tips, although we will provide some. Rather, the workshop is designed to enhance participants' ability to make effective and inclusive pedagogical choices. The interactive sessions provide opportunities for participants to reflect with colleagues on how to individualize evidence-based best teaching practices to their own idiosyncratic teaching contexts and their own understanding about what matters most for inclusive pedagogy. Participants will learn how to identify and select challenging, transformative, and inclusive learning goals, how to design a course around those learning goals, and how to make the achievement of those goals highly likely.

#### Eligibility & Fees
